

Subscription Selection

Monday, 17 April 2023

8:06 PM

1. Subscription Selection

a. References

- 1) <https://confluence.int.mcafee.com/pages/viewpage.action?spaceKey=WPS&title=Subscription+Selection>

b. Drivers for this solution

- 1) Using Paid subscription when they get trail from OEM
- 2) Privacy and identity features usage across subscription
- 3) Using same sub across devices
- 4) Remove the burden for user to select the sub instead we select the sub for user

c. Scope

- 1) Apps integrated with Einstein only
- 2) WSS is not in scope and it still needs reinstall

d. Rules

- 1) **Active above expired**, then
- 2) **Paid above non-paid** (non-paid could be trial or "free"), then
- 3) **Paid AR above Paid NAR** (only applicable for paid), then
- 4) **Expiry date in descending order** (furthest out is preferred)

e. Priority

- 1) AR subs takes priority
 - 1) Perpetual subs
- 2) Paid NAR Subs
- 3) Trial Subs
- 4) Expired

f. By Default - furthest expiry is shown

g. Per channel - Override rules/ Exceptions

- 1) For Stapples - user should not be able to switch to other subscription even if the
 - 1) It needs to be based on channel level config as we may need to override
- 2) Privacy and Identity guard would have take precedence
- 3) Tech bench
 - 1) It should not worry about existing subscription
 - 2) Privacy and Identity related products should take priority

h. Tech bench subs

- 1) Sub selector is hidden based on aff id and pkg id
- 2) Automatic selector Hint is left on the device for all tech bench flows
- 3) Einstein will pick the tech bench sub based on the hint passed by the client
- 4) Open issues
 - 1) There is open issue when we migrate WSS to WPS

e=Subscription+selection+in+WPS

ny have direct sub- Making subscription sticky
